Claim 1

The feature "two connection members are fitted longitudinally and connected sequentially respectively on adjacent wing portions on the left and right sides of core metals" of the subject matter of claim 1 is neither disclosed nor suggested in any of documents 1-3 and document 4 and does not appear to be obvious to a person skilled in the art.

Claims 2-19

As all the subject matters of claims 2-19 are defined by referring to claim 1, they appear to involve an inventive step.

Claim 20

The feature "the core metals are connected by forming fit-in holes at the ends of wing portions and fitting folded ends of second connection members, which are U-shaped in section, into the holes at the end of adjacent wing portions of core metals" of the subject matter of claim 20 is neither disclosed nor suggested in any of documents 1-3 and document 4 and does not appear to be obvious to a person skilled in the art.

Claims 21-26

As all the subject matters of claims 21-26 are defined by referring to claim 20, they appear to involve an inventive step.

Claim 27

The feature, "a rubber track of which adjacent wing portions on the left and right sides of core metals comprise connection members fitted longitudinally and connected sequentially, wherein each of the wing portions is divided into front and rear parts, and the divided wing portions are made to be substantially circular in section to serve as positions into which the connection members are fitted" of the subject matter of claim 27 is neither disclosed nor suggested in any of documents 1-3 and document 4 and does not appear to be obvious to a person skilled in the art.

Claims 28-31

As all the subject matters of claims 28-31 are defined by referring to claim 27, they appear to involve an inventive step.
